

## Clinical Document Topic Nomination Form

Thank you for assisting the American Academy of Audiology Board of Directors in identifying potential topics for clinical document development. The board will consider all suggested topics when reviewing and approving current priorities. Please note that many factors are considered in the selection process so submitting a topic is not a guarantee that a document will be developed. Academy members/committees/councils interested in submitting a guideline/clinical document topic proposal form or who may be interested in serving on a guideline/clinical document panel are strongly encouraged to review the [Guideline for Guidelines](#) manual that delineates important aspects of development processes.

Submitted by:

Proposed document title or subject matter:

Type of the proposed document (e.g., guideline, consensus statement, position statement, etc.):

Why is this guideline/clinical document necessary at this time? Rationale for prioritization:

Proposed scope/impact on primary audience (e.g., intended users)/health policy objectives, if applicable/summary of relevant data to consider:

Possible collaborations/partnerships with other organizations; rationale for including outside organizations or agencies for document development, if applicable:

If a document update, a brief summary of recent science justifying the need for an update:

Potential overlap with other current guidelines, consensus statements, or Academy documents:

Suggestions for members of the guideline/clinical document expert panel:

Please complete the form, as appropriate, and submit to the guidelines publication [staff](#).
