

Hearing Screening

Over-the-Counter Hearing Aids

Do you have hearing difficulties that you would like to improve? Answer these questions to see what type of care may be appropriate for you!

- 1** Do you experience dizziness, ringing in your ears, or drainage from your ears?
- 2** Do you feel like your hearing is worse in one ear than the other?
- 3** Do you still have a hard time understanding the TV, even if you turn up the volume?
- 4** Do you feel like you would need help outside of your household to set-up new technology?

If you answered “**no**” to all of these, OTC hearing aids may be a good fit for you!

If you answered “**Yes**” to any of these questions, you may need to see an audiologist for diagnosis and care.
